

Service Body Options

Security Options

- **Power Locks** enhance security and increase efficiency with one push of a button to lock or unlock all compartments
- Integration with the chassis keyless entry system (if equipped) allows for both body and cab to be operated with the chassis key fob
- Audible signals inform user when compartments lock, unlock, or if a compartment door is open and unsecured while attempting to lock
- **Codeable Padlock** operates with your factory chassis key for convenience and security
- The codeable key cylinder learns the tumbler code of your chassis ignition key, simply insert your chassis key, turn once, and the Codeable Padlock will be programmed to your key
- Use with Knapheide's Master Locking system so there's no need to carry multiple, or bulky sets of keys

Productivity Options

- **SpitzLifts** are available in both DC electric or Manual versions with the choice of a 3' or 4' boom length
- Booms are constructed of lightweight structural aluminum; with a weight of approximately 35lbs.
- Boom can be removed from base and easily disassembled for storing in the Service Body side compartments
- Allows single operator to safely lift loads up to 900lbs.
- Can be easily transferred and utilized from vehicle to vehicle

- **LED Compartment Lighting** increases your productivity while working in low light conditions
- Light strips are made of rigid plastic in order to withstand jobsite abuse
- Door activated switches automatically turn the compartment LED lighting on when the door is open and off when the door is closed

Organization Options

Before

After

- **Sortimo** results in increased efficiency and productivity on the jobsite
- A strong, yet lightweight design, provides easy mobility and an overall tough storage solution
- A properly organized truck results in less inventory, and more available payload storage
- All boxes snap into tracks and slide easily in and out of side compartments like drawers
- Sortimo has a variety of available storage boxes and compartment layouts to meet a wide array of vocational needs

S-Boxx

M-Boxx

L-Boxx

T-Boxx

- **Cargo Management System** improves your cargo area organization increasing your productivity and efficiency on the job site
- Aluminum track is equipped with a removable cap on both ends to retain accessories but allows user to add additional accessories
- Accessories have a spring loaded button that allows for positioning on an aluminum track in 4" increments to fit any application
- Available accessories include tank holders, pipe holders, 2x4 holders, light and heavy hook holders, ladder holders, and tool holders
