KNAPHEIDE UTILITY RACK

Get the most out of your service body by adding a Knapheide Utility Rack.

The versatile design allows for functionality that traditional material racks do not. The raised crossmembers allow loading by a forklift from either side. The rear crossmember swings and stows away, while the center section(s) remove and stow over cab for loading taller items.

STANDARD FEATURES

- A** 1,000 lb. load capacity with heavy duty square and rectangular steel tube design
- B** Swing away rear crossbar locks into place on curb side for easy loading of taller items
- C** Removable center cross bar(s) can be secured on the overcab portion of the rack
- D** Design allows for utility rack to be loaded by a forklift from either side
- E** Tapered rear vertical posts for stylish appearance
- F** Modular design and bolt-on application for convenient knock-down shipping and easy installation
- G** Standard finishes available in black or white powder coat
- H** Tie down hook on every vertical post for securing cargo

I Front round crossbar to eliminate road noise and decrease wind drag

J Compatible with J, FJ, FJ40, and LPJ models in 96, 108, and 132 series standard service bodies
