

### PRODUCT INFORMATION

This 2 crossbar ladder rack is ideal for step and extension ladders and features a handle on the curb side that rotates the ladder from the roof stowed position to the side deployed position. The street side includes end stops to prevent ladders from shifting during transit, with additional restraining suggested when in use. The powder coated aluminum construction with padded rubber contact surfaces will keep your rack and ladders protected to ensure a long service life. Hydraulic cylinder(s) provide smooth and controlled movement of ladder with automatic clamping built-in.
