COMMITMENT TO CORROSION RESISTANCE

Corrosion won’t be a concern when you buy quality Knapheide products. To give you the best corrosion protection, we utilize a state-of-the-art, custom-designed, 12-step SST cathodic electrodeposition finishing system, called “E-Coat.” It bonds prime paint to steel by an electroplating process to give you a superior coat of primer, resulting in better corrosion protection compared to spraying methods.

This system allows us to create products with the highest level of corrosion resistance available.
