

The Hose Holder can be fastened to the front or rear Shelf Staxx end panels. It comes with mounting screws and nuts.

1000002820 HARDWARE KIT		
QTY	PART #	DESCRIPTION
4	71004896	SCREW (M6 X 16)
4	71003884	PAWL NUT (M6)

1. Determine the desired location to mount the hose holder. Install one screw thru the hose holder and any of the Shelf Staxx end panel predrilled holes.

NOTE: Tabs on back of hose holder may have to be removed prior to installation in order for the hose holder to sit flush on the Shelf Staxx end panel (see reverse).

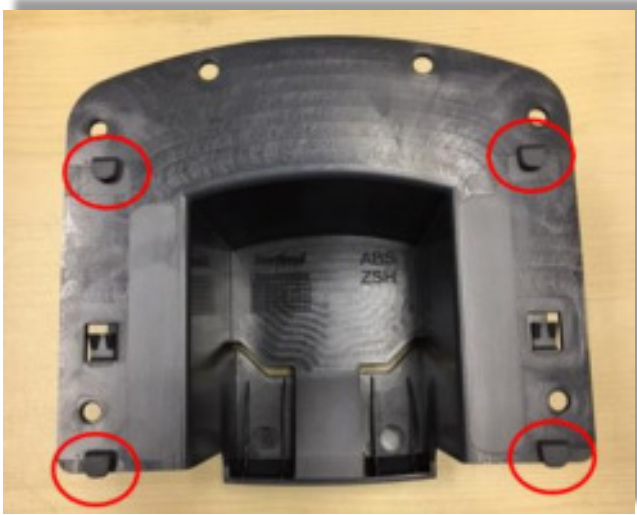

2. Level the hose holder and mark upper and lower hole locations to be drilled thru the Shelf Staxx end panel.

Remove the previously installed mounting screw and the hose holder. Drill 1/4" holes thru the end panel in the marked locations.

3. Install the hose holder with the provided hardware.

NOTE: The Hose Holder is manufactured with 4 plastic tabs that are normally removed after the production process. Prior to mounting to the Exxpand Staxx be sure to confirm that these tabs have been removed. Tabs can easily be removed using a pair of wire snips.
